Profile

Aspiring Software Engineer with hands-on experience developing full-stack applications, real-time platforms, and AI-powered solutions using modern web technologies. Strong foundation in Java, Data Structures and Algorithms, backend development, and databases, with a passion for building reliable and user-centric software.

Education

2023 – Present	B.Tech in Computer Science (AIML), Keshav Memorial Institute of Technology, Hyderabad	8.00/10
2021 – 2023	Class 12, Sri Chaitanya Junior College, Khammam	98%

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, SQL
- **Frontend:** React, Next.js, HTML, CSS
- **Backend:** Node.js, Express.js, Prisma ORM, REST APIs
- **Databases:** PostgreSQL, MongoDB, MySQL, Firebase Firestore
- **Tools:** Git, Docker, Linux, Socket.IO, AWS, Cloudinary, Mapbox, Redis

Projects

- **PlayGrid – Sports Community & Venue Management Platform** [GitHub](#)
 - Engineered a full-stack sports community platform that enables players, organizers, and venue owners to discover matches, manage communities, organize tournaments, and coordinate sports activities.
 - Built the platform with React, TypeScript, Node.js, Express.js, PostgreSQL (Supabase), Prisma ORM, Firebase Authentication, Socket.IO, Cloudinary, and Mapbox, implementing secure authentication, scalable REST APIs, real-time messaging, and location-based venue discovery.
 - Integrated Google Gemini API for AI-powered content moderation and personalized recommendations while implementing notifications, community feeds, friend management, venue management, and responsive dashboards.
- **KetoWarrior – AI-Powered Nutrition Tracking Platform** [GitHub](#)
 - Built an AI-powered nutrition tracking platform using React, Node.js, Express.js, MongoDB Atlas, Firebase Firestore, Firebase Authentication, and Cloudinary for secure user management, persistent health records, and personalized dashboards.
 - Integrated YOLOv8 and Google Gemini API for food image recognition, multilingual nutrition analysis, conversational assistance, BMI calculation, calorie tracking, and real-time nutrient monitoring against personalized daily goals.
 - Implemented nutrition analytics with daily goals, streaks, and weekly, monthly, and yearly progress tracking to improve user engagement.
- **Recommend – AI-Powered Cross-Domain Recommendation Platform** [GitHub](#)
 - Built a full-stack recommendation platform using React, Express.js, Firebase Authentication, Firebase Firestore, and REST APIs, implementing secure authentication, role-based access control, personalized user profiles, and an administrator dashboard.
 - Integrated Google Gemini API to generate personalized movie, book, and music recommendations through semantic search, user preference analysis, and intelligent cross-domain content discovery.

Achievements

- **Amazon ML Challenge 2025 – AIR 257 / 10,000+ Teams:** Secured AIR 257 among 10,000+ teams by fine-tuning a multimodal CLIP model for product price prediction and improving predictive performance through SMAPE-based optimization and feature engineering.
